**FEATURES AND BENEFITS**

- Up to 1,000,000 duty cycles or 10 year DC life
- High power density
- 650F to 3,000F capacitance range
- Threaded terminals or laser-weldable posts

**TYPICAL APPLICATIONS**

- Automotive subsystems
- Wind turbine pitch control
- Hybrid vehicles
- Rail
- Heavy industrial equipment
- UPS & telecom systems

### ESR AND CAPACITANCE VS TEMPERATURE

![Graph showing ESR and capacitance vs temperature](image_url)

### NOTES

1. Capacitance and ESR\textsubscript{DC} measured at 25°C using specified test current per waveform below.
2. Absolute maximum voltage, non-repeated. Not to exceed 1 second.
3. After 72 hours at rated voltage. Initial leakage current can be higher.
4. Per IEC 62391-2, \( P_d = \frac{0.12V^2}{ESR\textsubscript{DC} \times \text{mass}} \)
5. \( P_{\text{max}} = \frac{V^2}{4 \times ESR\textsubscript{DC} \times \text{mass}} \)
6. \( E_{\text{max}} = \frac{\frac{1}{2} CV^2}{3,600 \times \text{mass}} \)
7. \( E_{\text{stored}} = \frac{\frac{1}{2} CV^2}{3,600} \)
8. \( \Delta T = I_{\text{rms}}^2 \times ESR \times R_{ca} \)
9. Cycle using specified test current per waveform below.
10. Cycle life varies depending upon application-specific characteristics. Actual results will vary.
11. Per United Nations material classification UN3499, all Maxwell ultracapacitors have less than 10 Wh capacity to meet the requirements of Special Provisions 361. When packaged according to the regulation, both individual ultracapacitors and modules composed of those ultracapacitors shipped by Maxwell can be transported without being treated as dangerous goods (hazardous materials).
MOUNTING RECOMMENDATIONS
Do not reverse polarity. Please refer to document number 1016419, available at maxwell.com for welding recommendations.

MARKINGS
Products are marked with the following information: Rated capacitance, rated voltage, product number, name of manufacturer, positive terminal, warning marking, serial number.
